## SIMPLE, COMPLIMENTARY FLEET MONITORING

### What is Ford Telematics Essentials?

Ford Telematics Essentials is a complimentary, web-based tool that uses data from your connected vehicles to keep your fleet on the road and your business moving.

### Vehicle Health Data

Monitor the health of individual vehicles in your fleet to help plan more effectively and minimise downtime. From manufacturer diagnostic codes with suggested actions and recall information, to customised maintenance schedules based on oil life, engine hours, time and mileage.

### FORDLiive

Ford Telematics Essentials links you into FORDLiive. Once subscribed, your Ford Authorised Repairer can access your connected vehicle health data. So, if there's a problem, they can identify it and plan any required work before your vehicle reaches the workshop.
